For the attention of Chris Williams

Dear Sir

Diamond 53 Building Project at Ha Long Shipyard – Vietnam

Following completion and delivery of the vessel to the new owners in June 2007 we would like to express our thanks to Graig and in particular your team based in the Far East for the successful completion of this project.

The challenges to the site team should not be underestimated in supervising the building of the first Diamond 53 vessel to be delivered in Vietnam. In particular John Gorman, who led the site team from day one, should be congratulated on completing the vessel to a good standard and in overcoming the many difficulties that will inevitably behest the first vessel in a series from a relatively inexperienced shipbuilder with limited knowledge of Western building standards.

We look forward to working with Graig on future projects and would like to finally express our full satisfaction with the management of the project.

Yours faithfully

P G W Vickers
